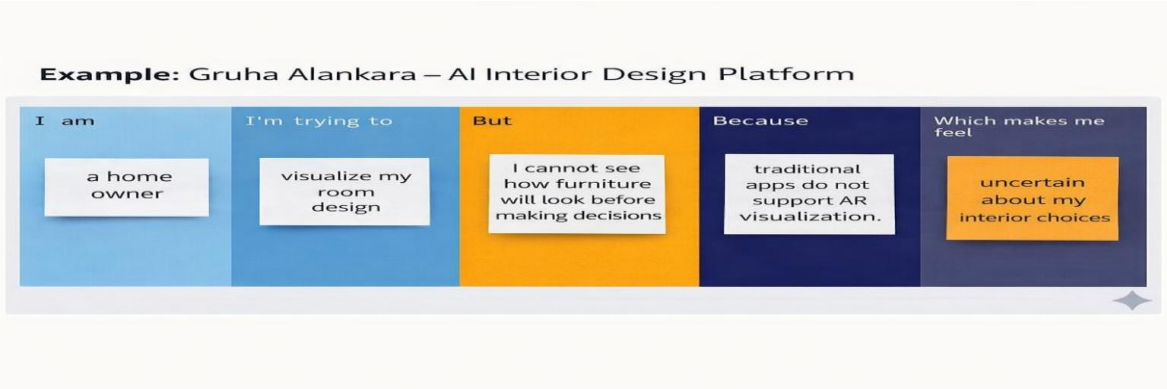
Project Name	Gruha Alankara: Interior Design Platform with AI Design Agent and Augmented Reality Visualization
Maximum Marks	2 Marks

Customer Problem Statement

A customer problem statement helps understand the user's perspective and challenges while designing their home interiors. Many users struggle to visualize furniture placement, color combinations, and room themes before purchasing furniture or decorating their rooms.The goal of this project is to solve these challenges using **Artificial Intelligence, Vision AI, and Augmented Reality** technologies. The system analyzes room images and provides intelligent design suggestions along with AR visualization for furniture placement.



Example:

Problem Statement(PS)	I am (customer)	I'm Tring to	But	Because	Which makes me feel
PS-1	Home owner	design my room interior using modern styles	I cannot visualize the design before implementing it	I do not have professional interior design knowledge	Confused about color combinations and furniture placement
PS-2	Apartment resident	see how furniture will look in my room before buying	I cannot preview furniture in my real environment	traditional apps do not support AR visualization	Frustrated and worried about buying the wrong furniture
